STAR saturation follows $s \approx 0.41/(p\langle|\theta|\rangle)$
Hubbard
Trotter angles
QUOPS
Largest passing size, any Q
Mean injected angle $\langle|\theta|\rangle$ (rad)
STAR saturation, $p = 0.001$
STAR saturation, $p = 0.0001$
Random circuits, $p = 10^{-3}$, standard threshold
Largest passing size s
Available physical qubits Q
STAR, $\langle|\theta|\rangle = 0.0015$
STAR, $\langle|\theta|\rangle = 0.005$
STAR, $\langle|\theta|\rangle = 0.015$
STAR, $\langle|\theta|\rangle = 0.05$
STAR, $\langle|\theta|\rangle = 0.196$
